

SHROUDS

Our custom chimney shrouds are precision engineered and manufactured using the latest CAD and CNC machine techniques. Each shroud is built to exact dimensions. NOTE: Certain styles have a maximum length of 50".

These are the finest shrouds on the market. Whether you need just 1 or 100, we can give you the competitive advantage.

Use our **Shroud Worksheet** on page 192 to gather all necessary information to place an order.

Animal Proof Screen

Screen is highly recommended to prevent the common occurrence of birds and animals nesting within the chimney shroud. Unscreened shrouds can become home to wildlife which creates a fire hazard.

We use 18 gauge 3/4" mesh which meets sizing requirements and will prevent wildlife intrusion.

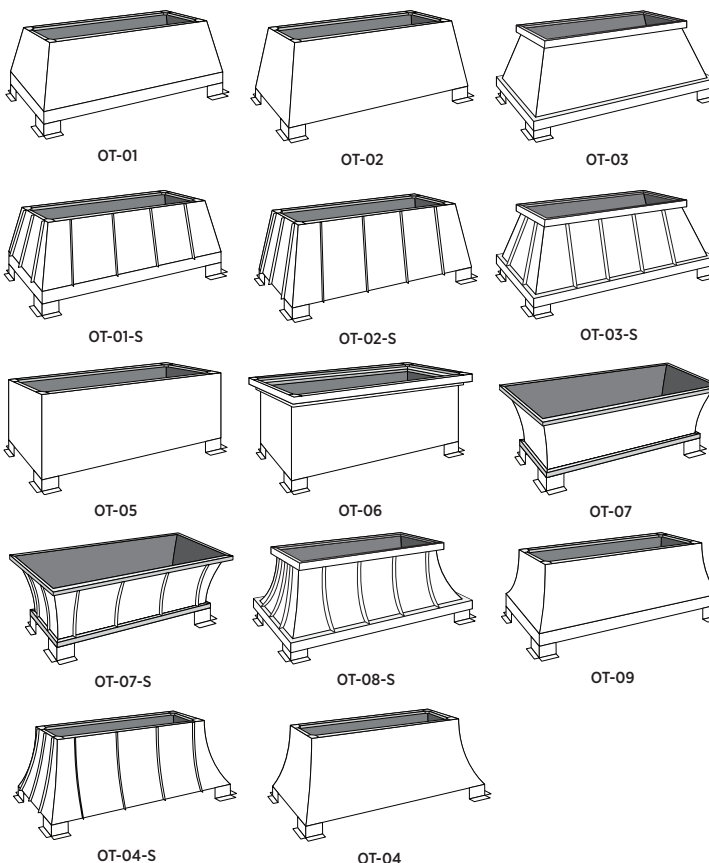

Removable top screen is standard when screen is selected for open top shrouds. This allows for easy maintenance.

SHROUDS

Top Mount

Mounts directly to the top of the chimney. This is by far the most common method of mounting.

Corner Outside Mount

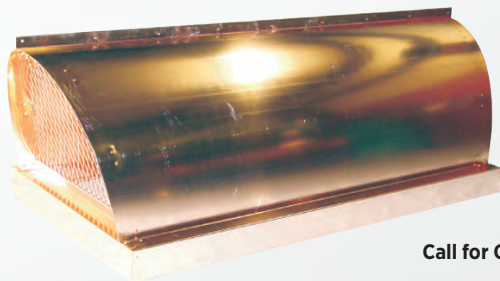

Mounts to the outside of the 4 corners of the chimney top. This provides a similar look as the top mount by simply extending the leg length over the four corners. This helps to prevent future leak problems.

Full Outside Mount

Mounts over the sides of the full perimeter of the chimney top. This provides a seamless clean look while helping to prevent future leak problems.

CUSTOM TRADITIONAL HOOD

Call for Quote

Features:

- 1" Standing Seam
- 3" Outside Skirt
- Screen Mesh On Ends, 3/4" Mesh
- Width Of Hood Determines Height Of Arch.

Options:

- 5/8" Mesh: Add 10%
- Drip Edge Available: \$10.00
- Available in Stainless Steel or Copper

LENGTH CANNOT EXCEED 48"

BARREL CAP

Call for Quote

The Barrel Cap offers good protection for the chimney from the elements. The cap is designed to compliment half-round dormers and radiused architectural features. The Barrel Cap is constructed of 100% solid copper.

Features:

- 100% Solid Copper
- Corner Reinforcements
- 4" Overhang

Options:

- Available In Outside Mount Or Top Mount Styles

LENGTH CANNOT EXCEED 48"
